Memo to File:

Re: Plateau Resources
Uranium Mill
ACT/017/001 016
Garfield County, Utah

Mr. Mike Sewell and Mr. Bill Luhis met with Ron Daniels on the 27th of March 1978 to discuss the latest developments on Plateau's Uranium Mill located near Bullfrog in Garfield County.

Plateau is still moving ahead with the planned move of this mill and license from a previous location in Shitmaring Canyon to a spot about three (3) miles southeast on millsite claims on the Public Domain. This move was endorsed by the Division after a field evaluation. The company is about to present to the Nuclear Regulatory Commission (NRC) an environmental analysis of the new proposed location and for a change in the mill process from carbonate leach to acid leach/solvent extraction.

The NRC was receptive to this change previously, but now is asking for a new license to cover the proposed facility. No details on the proposed change in position by NRC; Plateau is scheduled to meet with Mr. Ross Scarano on March 31st 1978 to discuss the request for a new license.

Messers Sewall and Luhis were assured that the Division still agrees with the change in location.
